Making popup Valentines, page 149

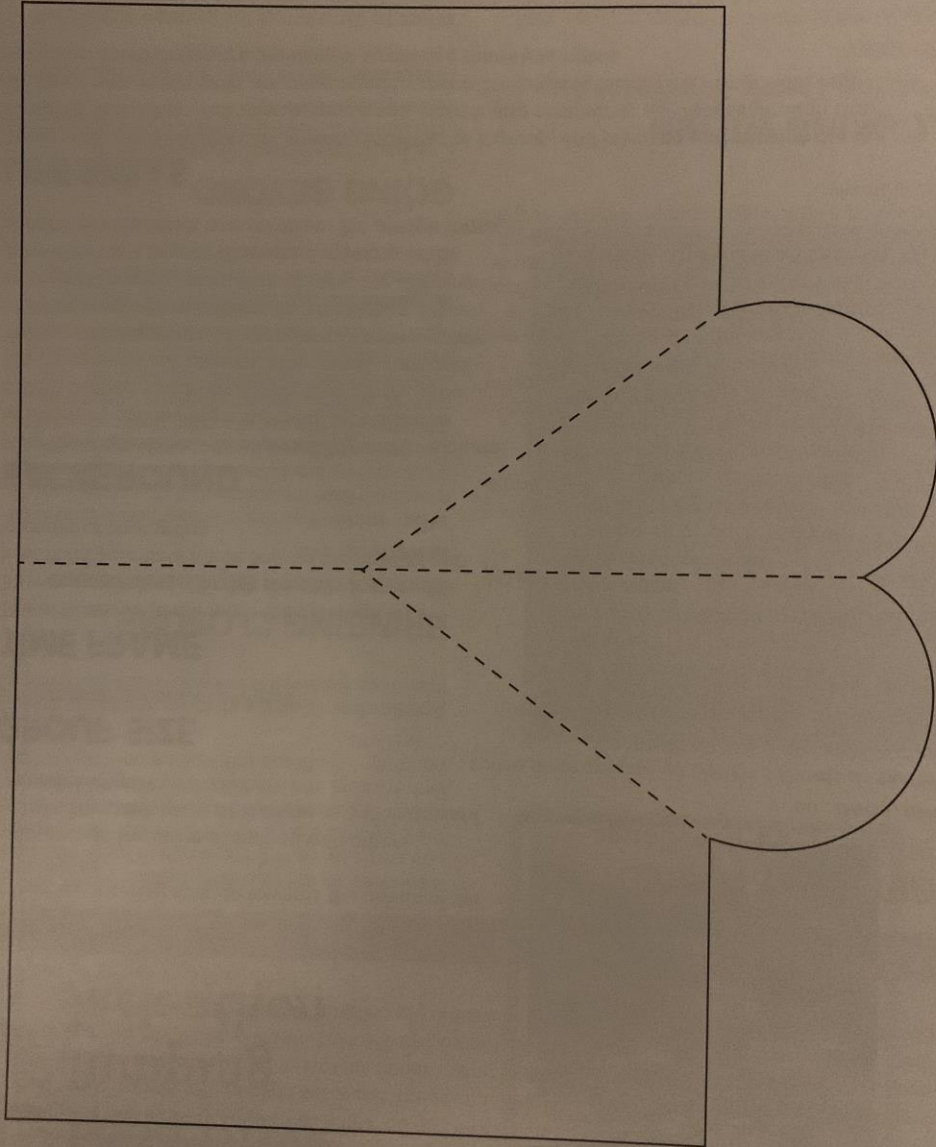

Welcome to the Kentucky 4H virtual experience. Today we're focusing on 4H cloverbuds. My name is Jennifer Tackett and I am an extension specialist for 4-H youth development

Today we're going to focus on citizenship and civic education and making pop up Valentine's to give away to local senior living center residents.

The materials that you will need are scissors, Valentine stickers, markers and a pop-up Valentine pattern and red white and pink construction paper.

You will first need to cut around the edges of the pop up Valentine pattern. You will fold the Valentine on the dotted lines shown. Next the you can decorate it with stickers and markers and personalize your Valentine if you have a specific friend in mind. You don't have to just to send them to your local senior living residence. Think of other people in your neighborhood or home that you could make special pop up valentine for.

Thank you for joining me today for the Kentucky 4H virtual experience focused on 4H cloverbuds. For more information regarding cloverbud projects check out our local university of Kentucky cooperative extension Service.
