

GARDEN TRACTOR DRIVING COURSE

NOTE: Solid arrow is for forward travel and dashed for backing.

Spotting Block
(2"x4"x12" block with
1/2" Dia. hole in end
resting on other blocks)

- A - Width* of tractor + 4"
- B - Width of tractor + 2"
- C - Length of tractor + 6"
- D - Length of tractor + 5'

This course may be set up on grass where each dot represents a tobacco stick. Additional sticks or string may be placed between end stakes to more clearly define the outline.

The course may be set up on concrete or black top where each dot is a gallon can weighted with dirt or sand and holding a tobacco stick. Chalk or tape or extra cans-sticks can be used to more clearly define the outline.

Dimensions A, B, C, and D may need to be adjusted some because of the various sizes and shapes of garden tractors and their mower housing.

A judge, leader or the dealer should drive the tractor through the course to make sure it can be done safely and also be a feasible testing facility before contestants drive through.

*Widest point on tractor, usually mower housing.
