

Herb Container Garden

Fill Container with dirt

Plant seeds in dirt, but not too deep!

Water and cover with plastic wrap until you see them sprout.

Once sprouted, take plastic wrap off and keep soil moist but not soaked

Thin seedlings so they are not too crowded

Make sure your pot is in a sunny location

Once the last chance of frost has passed, you can keep your herb garden outside!

Bring it to enter in the Jessamine County Fair on July 5 or 6! (We take entries both days)
